Bio

I build clean, scalable web and mobile apps. I'm interested in SEO and practical design and enjoy tackling complex problems. Naturally open-minded, I apply this to my career: exploring new technologies and determining their practical fit.
Outside of work,I train BJJ as a long term commitment - which keeps me disciplined, focused and solution oriented under pressure. This routine helps me reset and maintain physical, mental stability.

Experience

Frontend/Mobile Developer - Ferrum Capital (2024/Present)

- Architect and implement scalable user interfaces using React, Next.js, and React Native, emphasizing component-driven design, code splitting and optimization techniques
- Develop and maintain cross-platform mobile applications with React Native, managing the full lifecycle from feature implementation, build configuration and signing to production deployment on Google Play Console
- Integrate frontend systems with REST APIs, implementing efficient data fetching (mostly with React Query/Tanstack), caching strategies and error handling for optimal user experience
- Coordinate functional workflows and task management via Notion, ensuring alignment on timelines and technical decisions
- Refactor and maintain large-scale legacy codebases through debugging, performance auditing, technical debt reduction and feature enhancements while upholding code quality standards

Software Developer Freelance (2023)

- Created responsive and visually clean websites for various devices and browsers
- Coded and implemented components mainly using Next.js
- Optimized websites for speed, efficiency and performance before and after deployment
- Improved search engine visibility with basic SEO techniques
- Handled hosting, domain registration and configuration
- Deployed websites ensuring a smooth and error-free release
- Integrated and managed databases using Supabase and Firebase
- Worked with data structures, authentication and serverless functions to build robust applications

Project Manager - Azerimed (2020/2022)

- Marketed and organized laboratory services
- Handled reports and maintained necessary documentation
- Ensured services were provided in line with established protocols
- Managed partnerships with major organizations like UEFA, AFFA, Qarabagh and Azersun

Technical Skills

TypeScript, ReactJS, NextJS, React Hook Form, Zod, TanStack Query, Redux, Tailwind CSS, shadcn/ui, Svelte, React Native, Supabase, Firebase, Git

Soft Skills

- Clear communication and cross-team coordination
- Strong analytical problem-solving, especially in refactoring legacy code and reducing technical debt
- Solid grasp of UI/UX design principles with focus on clean, performant interfaces

Languages

English (C1), Russian (C1), German (A1), Turkish (B2), Azerbaijani (Native)
